This chapter from CCNP Routing and Switching Portable Command Guide provides an example of how to configure inbound and outbound distribute list route filters. You cannot edit individual values in a template category as all templates are predefined. You cannot use a new SDM template without reloading the router.

I’ve recently had the mixed fortune to have set up a couple of Cisco routers for 3G and 4G data services. It turns out to be an interesting challenge. Here is an example configuration showing the key elements:

```
interface References.
